## WE LOVE TRANSPORTATION...

Transportation is the most important link in any supply chain. Unfortunately, it's often the weakest link. Manufacturers spend excessive time arranging, monitoring, re-scheduling, auditing, filing claims, following up and paying for transportation, which can cost a company over 6% of total spend.

### We can help....

Promax is a 3PL, we are not a carrier. Think of us as your transportation department, and we love our job! Our experts shop hard, pick the best carrier, then manage your freight from pick-up to delivery. Our team knows the transportation business; that's all they do. LTL, FTL, Milk Runs, Dedicated Cartage, Air Expedite and Ocean; We serve some of the largest manufacturing companies in the world, and we would like to work for your company.

Customers like how we make transportation "easy" for them. Just give us a call. We will compare our costs to those your company is currently paying, then send you a complete, confidential no obligation transportation report showing where our volume advantages can reduce cost for your company.

You have nothing to lose, and a lot to gain. It's not just about savings, the supply chain manager for one of our manufacturing customers received a nice promotion as a direct result of lowering cost and improving on-time delivery for their company. His secret?

**Promax Total Transportation.**

## Operations

Promax manages the day to day transportation so your team can concentrate on manufacturing. Our Total Transportation Service provides..

- **Dispatch and Control**
- **Shipment Track/Trace**
- **Invoice Audit**
- **Invoice Payment**
- **Claims Support**
- **Vendor Compliance**
- **Reporting**
- **Shipper/Receiver Coordination**
- **Process Definition (ISO)**

## Freight Expediting

When the production line is threatened, there's no time to shop for carriers. In partnership with our parent ITOCHU, Promax maintains contracts with large and small freight expediting service companies around the world. Whether it's over the road within the USA, or an air charter from another continent, our team will get the parts to the line so your team can focus on production!

Expediting freight can be very expensive. However, if your company is a Promax partner, you will already know what your cost will be. We work on a set margin. No last minute hidden handling or expediting fees.

**Call Marianne Carella (513) 413-2102 the next time you need an expedite service.**

## KEY BENEFITS OF TOTAL TRANSPORTATION..

### Dispatch

Promax will manage all daily transportation operations for your company. When your supplier has a shipment ready, they call us. We make all of the arrangements and notify your staff of the important shipment information.

### Freight Audit

Many companies do not effectively audit their freight bills, costing industry hundreds of millions of dollars annually. Using Promax will reduce your cost of accounting and administration and may save you from billing errors as well. Our transportation staff audits every freight bill to ensure the information and costing is accurate.

### Invoice Payment

After the invoice has been audited, Promax pays the carrier. Your company will receive one detailed shipment listing with whatever information your company requires. You get one report instead of hundreds of freight bills, invoices and statements every month. This is THE feature our customers rate the highest.
